## Education

---

Rochester Institute of Technology (RIT)  
BS in Web and Mobile Computing

Credit Earned: 117

## Project

---

### SWIPS

April 2022 - Current

#### iOS Developer

- The monetary app enables users to easily split transaction fees, transfer funds, and scan receipts for more efficient financial management.
- Constantly updating the project structure and using concurrency, MVVM pattern, OOP architecture, SOLID principles, etc.
- Publish it on TestFlight, invite people to test it, and receive feedback to continuously improve the app's quality and optimize the user experience.
- Created a data store for the app using Firebase, implementing user authentication, and enabling push notifications.

## Work Experience

---

### Fini

Remote

#### iOS Developer Internship

Nov 2022 - Current

- An app is a health and wellness platform that allows users to log their progress, compete with others, and achieve their goals in a fun and interactive digital playground.
- Implement a calendar view that displays achievements in a clear and user-friendly format to help users track their progress more effectively.
- Active participation in team discussions and providing feasible ideas based on user experience and adherence to iOS style guidelines.

### Instahub

Remote

#### iOS Developer Internship

July 2022 - Sep 2022

- The Data Logger app provides users with a convenient way to monitor their product's daily data and operational status.
- Becoming a one-page leader requires the ability to conceptualize ideas and structures, create and report on components and tasks, and communicate and update progress instantly to ensure the success of the project.
- Proposed an "In-Draft" feature that allows users to save incomplete forms for later completion.
- Created detailed documentation and sketches of the app's interface and functionality to help the team with a quick and comprehensive overview of the app.

### Orlando O Spencer I, Inc.

Remote

#### iOS Developer Internship

May 2022 - July 2022

- Complete floating button feature that supports dragging, automatically snaps to the edge of the screen, and allows for customization of icons or content.
- Convert some pages from UIKit to SwiftUI, ensuring that the conversion process is reliable and the converted pages work as intended.
- Organize the app checklist, report on the completion status of features and requirements, check for bugs or issues in the app, and supplement and submit content as needed.
